

MULTIPLE SMOKE DETECTOR WIRING DETAIL FOR POLON ALFA DOR40

The Polon Alfa Smoke detector is run in conjunction with the D&H RZN 4404 K V2 control panel.

- A maximum of 14 detectors can be wired into this panel.
- The diagram below details the wiring from the panel including the position of the 10K resistor found in the RM external trigger output in the D&H control panel.
- The 10K resistor will be placed in the out terminals on the last detector in the line.
- WEJ- in
- WYJ-out
